

Code-Layout, Readability and Reusability

Codebase Structure & Architectural Quality Evaluation

Maximum Marks: 2

DATE	TEAM ID	PROJECT NAME
29 September 2026	SWTID-2026-5457	PocketSmart AI

Area	Evidence in PocketSmart AI
Backend organization	<code>app.py</code> groups setup, constants, rate limiting, security, JWT helpers, database helpers and application routes.
Naming	Functions such as <code>get_db()</code> , <code>_verify_jwt()</code> , <code>renderAIRecommendations()</code> and <code>formatMoney()</code> communicate purpose.
Reusability	Authentication decorator, database abstraction and formatting helpers reduce duplicated logic.
Frontend separation	HTML template, static JavaScript and static CSS are separated into dedicated directories.
Configuration	<code>SECRET_KEY</code> and <code>DATABASE_URL</code> are environment-driven; Gemini key is supplied through the client configuration.
Readability	Comments and section headers divide major application concerns.
